- 3.5.1 The proposed development is located at land off Oak Close, Castle Gresley, Swadlincote. The development will be accessed off Oak Close.
- 3.5.2 The proposed development has good links to the existing walking and cycling infrastructure.
- 3.5.3 The nearest bus stops to the development is served by frequent bus services to Linton, Burton and Swadlincote.
- 3.5.4 The nearest railway station is Burton-on-Trent, located approximately 5.4miles (8.6km) from the proposed development. The station is served by half hourly trains to Nottingham and hourly trains to Birmingham New Street and Cardiff Central, with stops including Derby and Tamworth.

4.0 Accessibility

4.1 Introduction

4.1.1 Planning policy highlights the need for sustainable developments to have good accessibility to education, health facilities, employment, leisure and retail. Paragraph 38 of the National Planning Policy Framework (NPPF) states 'Where practical, particularly within large scale developments, key facilities such as primary schools and local shops should be located within walking distance of most properties'.

4.1.2 This section therefore considers the accessibility from the development, by modes of sustainable transport, to local facilities including education, health services, employment, leisure and retail. A plan showing the location of key local facilities local to the development site is enclosed in Appendix C.

4.1.3 Walking

4.1.3.1 With reference to the Chartered Institution of Highways and Transportation (CIHT) publication (Guidelines for Providing for Journeys on Foot' (2000), it is suggested that around 80% of walk journeys and walk stages are less than 1 mile (1610m). This guidance also provides 'suggested acceptable walking distances', which are set out in Table 4.1 below.

4.1.3.2 Indicative walking time calculations have been calculated assuming a 'typical' walking speed of approximately 1.4m/s or 3mph. These are shown against the suggested walking distances set out in Table 4.1 below.

Walking Distances and Journey Times						
	Town Centre		Commuting/School/Sight Seeing		Elsewhere	
	Distance (m)	Time (mins)	Distance (m)	Time (mins)	Distance (m)	Time (mins)
Desirable	200	2.4	500	6.0	400	4.8
Acceptable	400	4.8	1000	11.9	800	9.5
Preferred Maximum	800	9.5	2000	23.8	1200	14.3

Table 4.1

4.1.3.3 A plan showing the location of key local facilities local to the development site is enclosed in Appendix C.

4.1.4 Cycling

4.1.4.1 Section 3.10 of the Local Transport Note 1/04 states that generally a 4km cycle distance is considered acceptable.

4.1.4.2 Assuming a cycle speed of 12kph, the maximum accepted time for a cycling journey is 20 minutes.

4.2 Accessibility to education

- 4.2.1 The proposed development is located within approximately 1.5miles (2.4km) of the nearest primary school, Linton Primary School, which is located on Main Street, Linton. The location of the primary school is within an acceptable cycling distance from the proposed development.
- 4.2.2 The nearest secondary school, The Pingle Academy, is located in Swadlincote, approximately 3.5miles (5.7km) from the proposed development. The Pingle Academy can be accessed via a multi-modal route utilising the 22 school bus from the Linton Road bus stop.
- 4.2.3 The proposed development is shown to be within cycling distances of primary education. Secondary education can be accessed utilising school bus services.

4.3 Accessibility to health

- 4.3.1 The nearest doctors' surgery is Gresleydale Health Centre, located in Church Gresley, approximately 1.1miles (1.7km) from the proposed development. The location of the doctors' surgery is within preferred maximum walking distance and acceptable cycling distance of the proposed development.
- 4.3.2 The nearest hospital is Burton Hospital located in Burton, approximately 6.9miles (11.6km) from the proposed development. The hospital can also be accessed via a multi-modal route: walking to the eastbound Linton Road bus stop located approximately 423m from the site entrance, taking the 21 bus service to New Street (Stand 3) and walking to New Street (Stand 4). Then taking the number 8 bus to Graduate Medical Centre and walking approximately 140m to Burton Hospital.
- 4.3.3 The nearest dentist is located on Alexandra Road, Swadlincote, approximately 2.6miles (4.2km) from the proposed development. The location of the dentist is within acceptable cycling distance of the proposed development. The dentist can also be accessed via a multi-modal route: walking to the eastbound Linton Road bus stop located approximately 425m from the site entrance, taking the 21 bus service to Market Street and walking approximately 700m.
- 4.3.4 The nearest pharmacy is located in Castle Gresley on Linton Road approximately 550m from the proposed development. The location of the pharmacy is within acceptable walking and cycling distance of the proposed development.
- 4.3.5 The proposed development is shown to be located within acceptable walking and cycling distance of health facilities. The health services can also be accessed via a multi-modal route utilising the local bus services.

4.4 Accessibility to retail and leisure

- 4.4.1 The proposed development site is located within walking and cycling distance of Castle Gresley and cycling distance of Swadlincote. The proposed development is also within close proximity of regular bus services which provide connections to shopping and leisure opportunities in Linton, Burton and Swadlincote.
- 4.4.2 The proposed development is shown to be located within acceptable cycling and public transport distances of retail and leisure services.

4.5 Accessibility to employment

- 4.5.1 The proposed development site is located within walking and cycling distance of Castle Gresley and cycling distance of Swadlincote. The proposed development is also within close proximity of regular bus services which provide connections to employment opportunities in Linton, Burton and Swadlincote.
- 4.5.2 The proposed development is shown to be located within acceptable cycling and public transport distances of employment opportunities.

5.0 Vehicle trip impact

- 5.1 The proposed development will comprise 70 dwellings. Person trip generation rates have been obtained from the TRICS database version 7.6.1. The TRICS data is enclosed in Appendix F. The parameters selected to obtain the TRICS data is detailed in Table 5.1 below.

TRICS Parameters	
Parameter	Selection
Main Land Use	03 – Residential
Sub Land Use	A – Houses Privately Owned
Locations	Suburban Area Edge of Town Neighbourhood Centre Free Standing
Quantum of Development	Number of Dwellings

Table 5.1

- 5.2 Person trip rates are shown in Table 5.2 below.

Proposed Person Trip Generation Rate – 85% Percentile						
Use	AM Peak (0800-0900)			PM Peak (1700-1800)		
	Arrivals	Departures	Total	Arrivals	Departures	Total
Residential per dwelling	0.327	1.157	1.484	0.803	0.350	1.153

Source – TRICS database version 7.6.1 – 27/03/2019

Table 5.2

- 5.3 From the above person trip rates, the number of person trips for the proposed development can be calculated based on a development size of 70 dwellings. The predicted person trips from the proposed development are set out in Table 5.3 below.

Proposed Person Trips						
Use	AM Peak (0800-0900)			PM Peak (1700-1800)		
	Arrivals	Departures	Total	Arrivals	Departures	Total
Residential	23	81	104	56	25	81

Table 5.3

- 5.4 To predict the number of trips generated by mode of transport, travel to work data has been obtained from the 2011 Census for the Linton Ward which the proposed development is located within. The journey to work data is shown in Table 5.4 below.

Method of Travel to Work Resident Population:
Linton Ward 2011 Census

Mode	Percentage	Number
Driving a Car or Van	82.3%	1,927
Passenger in Car	6.0%	141
On Foot	5.6%	130
Bus, Minibus or Coach	2.9%	67
Motorcycle, Scooter or Moped	1.4%	33
Bicycle	1.2%	28
Train	0.7%	16

Source: 2011 Census Data

Table 5.4

- 5.5 Using the above modal split information it is possible to predict the number of trips from the development made using all forms of transport. Whilst the data does not reflect the fact that not all peak period trips are made to work, it offers a good reflection of the actual circumstances. The predicted number of trips by mode from the proposed development is set out in Table 5.5 below.

Proposed Trip Numbers by Mode

Mode	AM Peak (0800-0900)			PM Peak (1700-1800)		
	Arrivals	Departures	Total	Arrivals	Departures	Total
Car	19	67	86	46	20	66
Car Passenger	1	5	6	3	1	4
On Foot	1	4	5	3	1	4
Bus	1	2	3	2	1	3
Motorcycle	0	1	1	1	0	1
Bicycle	0	1	1	1	0	1
Train	0	1	1	0	0	1

Table 5.5

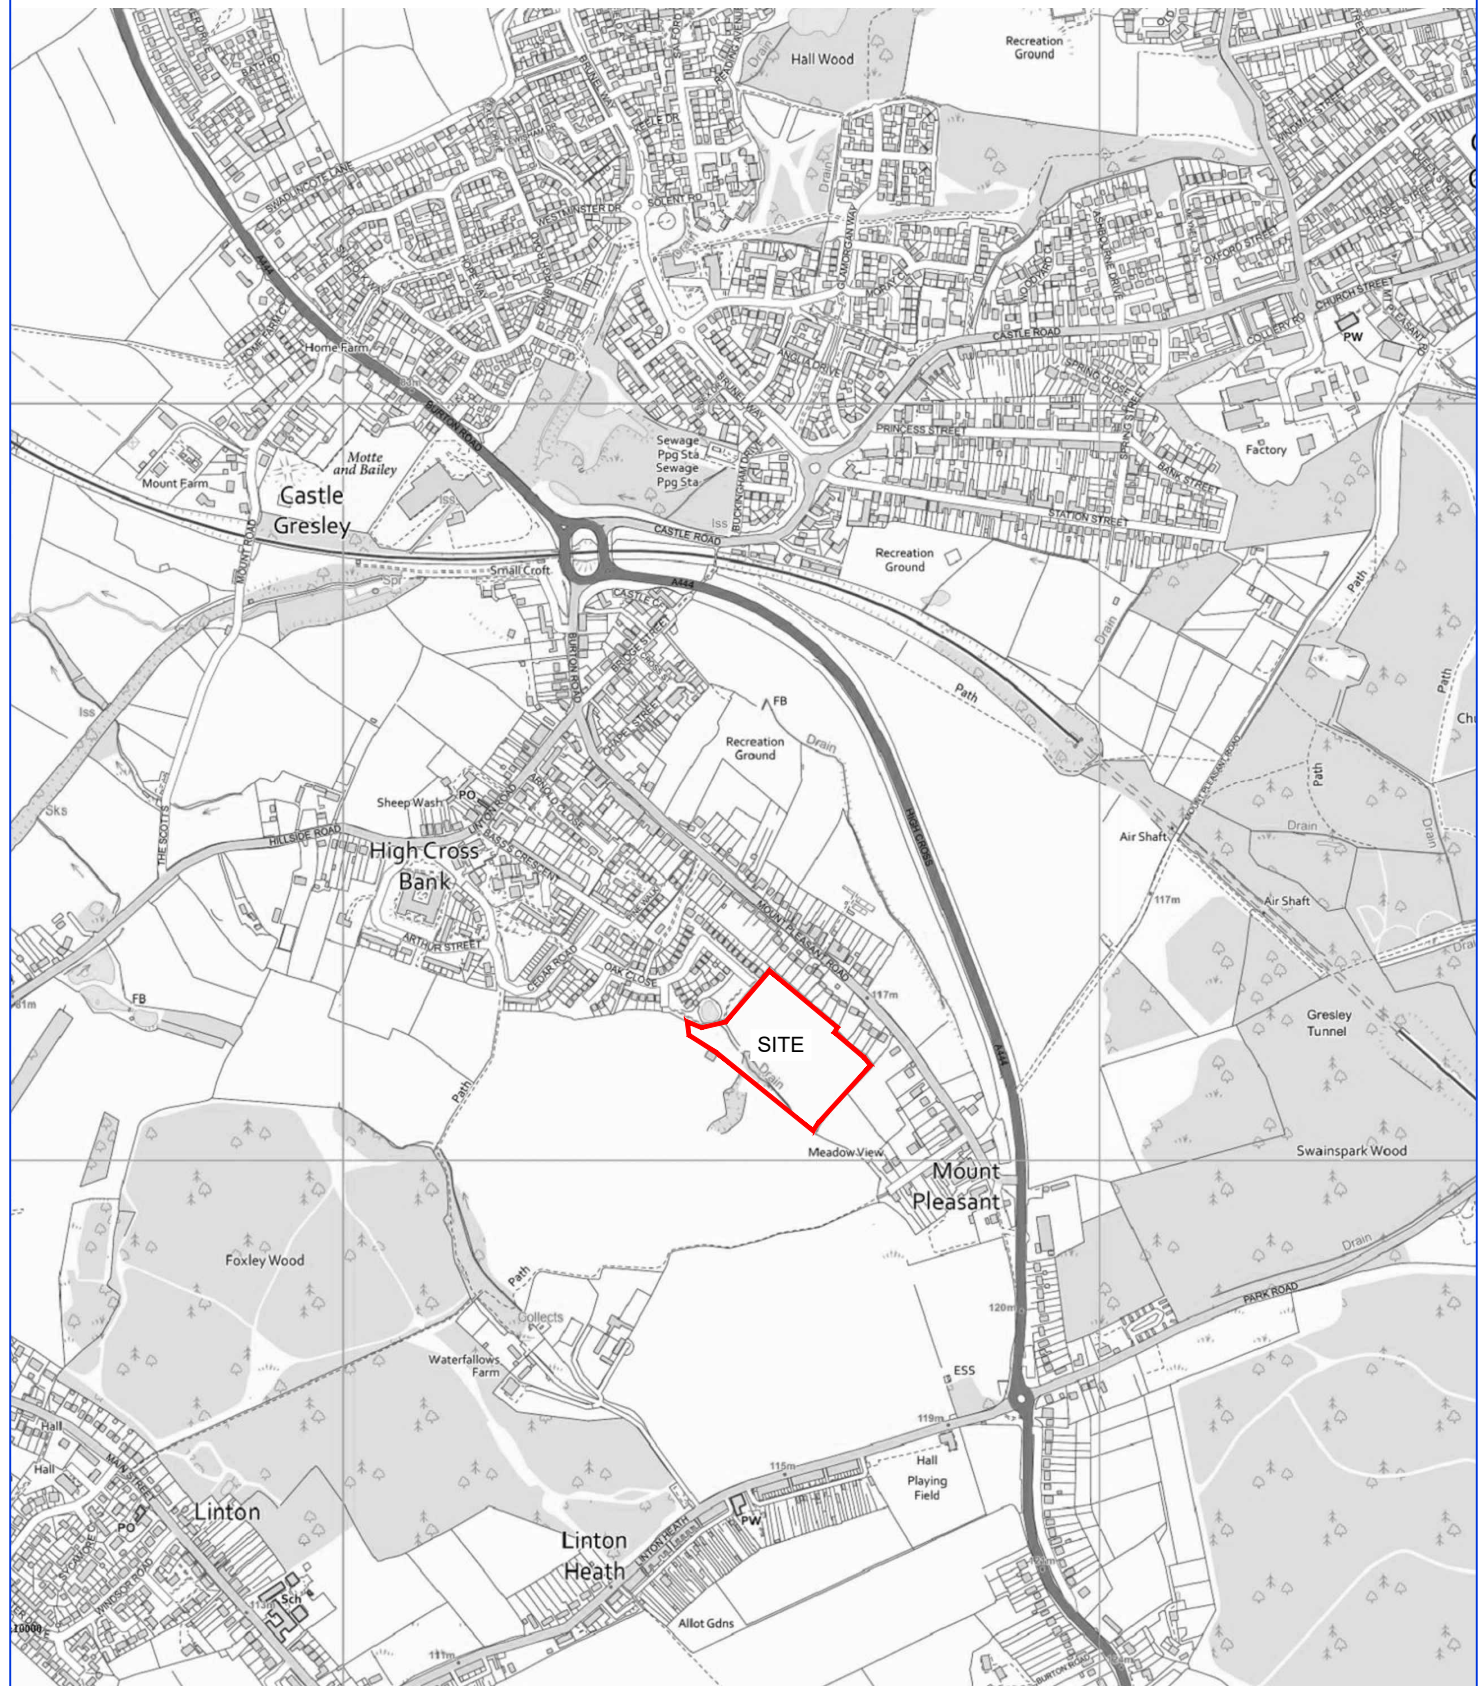

- 5.6 The proposed development is predicted to generate 86 new vehicle trips in the morning peak period and 66 new trips in the evening peak period. This equates to one new vehicle trip every 42s and 54s in the morning and evening peak periods respectively. This level of new vehicle trips is unlikely to be noticeable above daily fluctuations in background traffic.
- 5.7 It is unlikely that this small number of new vehicle trips will result in a significant adverse impact on the surrounding highway infrastructure.

6.0 Conclusions

- 6.1 The proposed development site is located at land off Oak Close, Castle Gresley, Swadlincote. The site is bound by existing residential dwellings to the north-east and the north-west and agricultural land to the south-east and the south-west.
- 6.2 The proposed development will comprise 70 dwellings.
- 6.3 The proposed development is shown to be well served and accessible to more sustainable modes of transport. The proposed development has good accessibility to education, health, employment, retail and leisure facilities.
- 6.4 The proposed development will be accessed off Oak Close by extending the existing highway into the site.
- 6.5 It is considered unlikely that the number of new vehicle trips generated from the proposed development will result in a significant adverse impact on the surrounding highway infrastructure.
- 6.6 A Framework Travel Plan has been produced for the development. This Travel Plan, which will be secured under a S106 agreement, will target a reduction in single occupancy vehicle trips.
- 6.7 There are therefore no reasons on highway grounds why planning permission for the development should not be granted.

This section displays actual (not average) trip rates for each of the survey days in the selected set, and ranks them in order of relative trip rate intensity, for a given time period (or peak period irrespective of time) selected by the user. The count type and direction are both displayed just above the table, along with the rows within the table representing the 85th and 15th percentile trip rate figures (highlighted in bold within the table itself).

The table itself displays details of each individual survey, alongside arrivals, departures and totals trip rates, sorted by whichever of the three directional options has been chosen by the user. As with the preceeding trip rate calculation results table, the trip rates shown are per the calculation factor (e.g. per 100m2 GFA, per employee, per hectare, etc). Note that if the peak period option has been selected (as opposed to a specific chosen time period), the peak period for each individual survey day in the table is also displayed.

This section displays actual (not average) trip rates for each of the survey days in the selected set, and ranks them in order of relative trip rate intensity, for a given time period (or peak period irrespective of time) selected by the user. The count type and direction are both displayed just above the table, along with the rows within the table representing the 85th and 15th percentile trip rate figures (highlighted in bold within the table itself).

The table itself displays details of each individual survey, alongside arrivals, departures and totals trip rates, sorted by whichever of the three directional options has been chosen by the user. As with the preceeding trip rate calculation results table, the trip rates shown are per the calculation factor (e.g. per 100m2 GFA, per employee, per hectare, etc). Note that if the peak period option has been selected (as opposed to a specific chosen time period), the peak period for each individual survey day in the table is also displayed.

This section displays actual (not average) trip rates for each of the survey days in the selected set, and ranks them in order of relative trip rate intensity, for a given time period (or peak period irrespective of time) selected by the user. The count type and direction are both displayed just above the table, along with the rows within the table representing the 85th and 15th percentile trip rate figures (highlighted in bold within the table itself).

The table itself displays details of each individual survey, alongside arrivals, departures and totals trip rates, sorted by whichever of the three directional options has been chosen by the user. As with the preceeding trip rate calculation results table, the trip rates shown are per the calculation factor (e.g. per 100m2 GFA, per employee, per hectare, etc). Note that if the peak period option has been selected (as opposed to a specific chosen time period), the peak period for each individual survey day in the table is also displayed.

This section displays actual (not average) trip rates for each of the survey days in the selected set, and ranks them in order of relative trip rate intensity, for a given time period (or peak period irrespective of time) selected by the user. The count type and direction are both displayed just above the table, along with the rows within the table representing the 85th and 15th percentile trip rate figures (highlighted in bold within the table itself).

The table itself displays details of each individual survey, alongside arrivals, departures and totals trip rates, sorted by whichever of the three directional options has been chosen by the user. As with the preceeding trip rate calculation results table, the trip rates shown are per the calculation factor (e.g. per 100m2 GFA, per employee, per hectare, etc). Note that if the peak period option has been selected (as opposed to a specific chosen time period), the peak period for each individual survey day in the table is also displayed.

This section displays actual (not average) trip rates for each of the survey days in the selected set, and ranks them in order of relative trip rate intensity, for a given time period (or peak period irrespective of time) selected by the user. The count type and direction are both displayed just above the table, along with the rows within the table representing the 85th and 15th percentile trip rate figures (highlighted in bold within the table itself).

The table itself displays details of each individual survey, alongside arrivals, departures and totals trip rates, sorted by whichever of the three directional options has been chosen by the user. As with the preceeding trip rate calculation results table, the trip rates shown are per the calculation factor (e.g. per 100m2 GFA, per employee, per hectare, etc). Note that if the peak period option has been selected (as opposed to a specific chosen time period), the peak period for each individual survey day in the table is also displayed.
