Subject: Planning application DMOT/2019/0873 for tree work at 185 Shortheath, DE12 6BL

Good morning Richard,

Thank you for your call this morning regarding the above application.

I can confirm that site visit has taken place and guidance regarding the Willow trees T7, T8 & T9 is that they should be cut at natural fracture points or at 1.5M from the ground. All other work was to be in line with the application.

Happy for the application deadline to be extended to close of business Fri 08 Nov.

Many thanks for your assistance with this matter. Please confirm receipt of this email.

Regards,

Simon Dunn
