

31 High St – door showing areas of brickwork to be replaced. Current bricks are crumbling and the door frame is loose, making the door difficult to close. Door with frame is approx. size: 90x 205cm.

Plan to reuse this door, but if necessary will get another the same (half glass, wood, multi point lock). Window was new when we redid the house about 9 years ago, so will hopefully be reusable.
