5th December 2019

Dear Mr Buckley

As the developer of the Ashwood Grange site in Aston on Trent I am writing to express our concerns following the recent heavy rain and subsequent flooding in the area, we have invested heavily in flood mitigation measures but it was noted recently that fallen leaves were causing the system to block and cause potential flooding in the area, a sample image is attached.

The main area of tree population responsible for this event are also identified in an attached image and as they are outside our conveyance we seek approval for the branches to be crowned back, they are also causing the adjacent properties gutters and gullies to flood despite constant cleaning.

We await your response regarding this matter and would gladly meet you on site to discuss further.

Regards

Paul Brennan
Regional Production Manager
