Product Description

This Plain concrete tile from Marley has a traditional design that gives a classic appearance to the roof. This versatile Plain tile is also suitable for dormers, eyebrows and conical roofs, as well as vertical cladding. The single camber design gives the Marley Plain tile an authentic look and is available in 9 distinctive colours.

Why Choose Marley Concrete Plain Roof Tiles?

The Marley concrete roof tile serves as an alternative to clay and slate. They offer the same appearance as more 'natural' products, but in similar colours to clay. Their benefits include being low maintenance and fire resistant. They are also cost-effective because of their manufacturing process. Concrete roof tiles can also be used in more extreme climates.
