Importance: High

FAO Steffan Saunders,

Apologies to Katherine for the delay in Natural England's response, but I can confirm on liaising with my Air Quality Lead on the basis of the additional confirmation email you sent to Natural England below that we are satisfied in this instant that a SCAIL assessment will not be required and that as a result we have No Objection to the proposal.

Kind regards
Andy

We are here to secure a healthy natural environment for people to enjoy, where wildlife is protected and England's traditional landscapes are safeguarded for future generations.

Natural England offers two chargeable services – The Discretionary Advice Service ([DAS](#)) provides pre-application, pre-determination and post-consent advice on proposals to developers and consultants as well as pre-licensing species advice and pre-assent and consent advice. The Pre-submission Screening Service ([PSS](#)) provides advice for European Protected Species mitigation licence applications.

We now offer free and chargeable advice to land owners and managers planning works on Sites of Special Scientific Interest through the [SSSI Advice Service](#)

Subject: Ref 352435: Pickstock Abattoir 2 Coal Lane Swadlincote FAO - Jacqui Salt

Dear Jacqui,

As Agent for Pickstock Foods who operate the Coal Lane Abattoir that is currently subject to planning application DMP/2020/0599 with South Derbyshire DC, I just wanted to clarify the nature of the current application.

The proposal relates to enclosing existing areas of the operation Abattoir site with respect to meeting Food Standard Agency regulations, this entails enclosing the existing animal run into the abattoir facility and enclosing existing stock pens and storage areas. The proposal also replaces existing water tanks, upgrades the product storage areas and re-organises the car parking. There are no new slurry, manure stores or additional livestock sheds proposed as part of this application. Rather the enclosure of existing livestock areas / entrances. AS such through the development proposed there will be no additional manure, whilst aerial pollutants will be better contained due to the enclosure of exiting external livestock areas.

For clarification there are no existing or proposed slurry lagoons or manure stores within the application site.

On this basis it would be appreciated if your request for further information is reconsidered. I have attempted to do the SCAIL calculation but it has not provided a result. Your advice on this matter would be greatly appreciated.

Regards

Kathy
