

The Hollow - Melbourne / Site Map

-

T1 - Holly - Dismantle to ground level. Eco Plug or root removal.

T2 - Spruce - Crown lift (Approx 3 / 4 Metres) to allow clearance from house and more light.

T3 - Yew - Crown Lift to allow clearance from wall and house as well as enable more light.
(Approx 3 / 4 Metres)

T4 - Holly - Dismantle to ground level. Root removal.

-

The work highlighted is allow some much needed maintenance to an already heavily tree populated area. The crown lifting is general minor work, the removal on T1 & T4 to enable a clearing of the area that is heavily suppressed by large overhanging mature trees situated on the neighbours property as well as in the Hollow. The removal of T4 will give the potential of renovating and upgrading the area for visitor parking and the improvement overall, visually of the area. Any work would be in keeping with the area.

The trees are out of main public view (off road & pavement and down shared drive) and the work will help to lighten the area and provide more room for natural growth with the remaining trees. It is a beautiful property with several mature trees and would benefit from what is overall fairly minor work and some clearing to help stop the area becoming dark, congested and gloomy.
