Subject: DMOT/2021/1279

FAO: Steven Mott

Good Afternoon,

Thank you for consulting the LLFA on the above referenced planning application. Based on our review of information submitted in support of the application we are not able to recommend discharge of Condition #13 until we receive additional information as indicated below.

- The Construction Health & Safety Plan, D463 for Project William, Derby, June 2021 indicates the proposed attenuation pond will be used for silt mitigation during construction activities. Please submit a construction phasing plan or similar to show that the attenuation pond will be constructed in the early stages of site construction and that it will have an appropriate operational outlet structure so that it will function as intended during the construction phase of the project. This information must show that the pond will function to prevent additional surface water run-off and provide suitable silt mitigation.

Please let me know if you have any questions regarding the above comments.

Kind regards,

John Vilas
Technician (Flood Risk Management)
Flood Risk Management Team

The Highways Service is currently receiving a high volume of enquiries. In order to manage our workload with the resources currently available to us, and also maintaining our statutory functions, we are prioritising our work according to risk. All other enquiries will be responded to, in as timely a manner as possible. We thank you in anticipation of your cooperation.
