

Applicant:
C Hill

Ref. No. DMPA/2021/1269
Made valid on: 13 December 2018

DECISION NOTICE

Description and location of proposal: The erection of a dwelling (the continuation of application ref. 9/2018/0865) at 57A Park Road, Newhall, Swadlincote, DE11 0TU

Decision made: In exercise of its powers as the Local Planning Authority under the Town and Country Planning Act 1990 and related subordinate legislation, South Derbyshire District Council hereby gives notice that permission/consent for the proposal as described above is hereby **Approved subject to the following Conditions:**

1. The development hereby approved shall be begun before the expiration of three years from the date of this permission.

Reason: To conform with Section 91 of the Town and Country Planning Act 1990 (as amended by Section 51 of the Planning and Compulsory Purchase Act 2004).

2. The development hereby permitted shall be carried out in accordance with drawing refs. 05/18/02 (Location Plan only); 57A.SBR.001 Rev A (Block Plan); 57A.PRE.007 Rev A (Front and South Elevations); 57A.PRE.008 Rev A (Rear and North Elevations); 57A.GFP.004 Rev A (Ground Floor Plan); 57A.GFP.005 Rev A (First Floor Plan); 57A.GFP.006 Rev A (Second Floor Plan); 05/18/06 (Garage Elevations and Plans); unless as otherwise required by condition attached to this permission or following approval of an application made pursuant to Section 96A of the Town and Country Planning Act 1990.

Reason: For the avoidance of doubt and in the interests of achieving sustainable development.

3. No development shall commence until a scheme of intrusive site investigation for coal mining legacy has been submitted to and approved in writing by the Local Planning Authority. The scheme shall be carried out in accordance with the approved details and a report of the findings arising from the intrusive site investigations, along with any remedial works required (including a timetable for the carrying out of such works), shall be submitted to and approved in writing by the Local Planning Authority prior to any construction works commencing. The approved remedial works shall thereafter be implemented in accordance with the approved timetable.

Reason: To protect the health of the public and the environment from hazards arising from past coal mining which might be brought to light by development of the site, recognising that failure to address such matters prior to development commencing could lead to unacceptable impacts even at the initial stages of works on site.

4. During the period of construction, no ground, construction or fitting out of works shall take place other than between 0730 and 1800 hours Monday to Friday and 0800 and 1300 hours on

Steffan Saunders

Authorised Officer of the Council

Date: 1 February 2022

Saturdays. There shall be no works undertaken on Sundays or public holidays except in an emergency.

Reason: In the interests of protecting the amenity the area and adjoining occupiers.

5. The development should be carried out in accordance with the recommended remedial works as set out in the Coal Mining Risk Assessment (CMRA) (Coal Authority Risk Assessment Version 1.1 dated 13/11/2018 - including in the accompanying timetable for the carrying out of such works). If the need for further remediation of mine workings and/or other mitigation measures are required that are not detailed in the CMRA these shall be submitted to and approved in writing by the Local Planning Authority before any further works take place, whereafter the remedial works shall proceed in accordance with these supplementary/revised details.

Reason: To protect the health of the public and the environment from hazards arising from previous uses of the site and/or adjacent land which may might be brought into light by development of it, recognising the failure to address such matters prior to development commencing could lead to unacceptable impacts even at the initial stages of the works on site.

6. If during development any contamination or evidence of likely contamination is identified that has not previously been identified or considered, a written scheme to identify and control that contamination shall be submitted to and approved in writing by the Local Planning Authority prior to any further works taking place on the site. This shall include a phased risk assessment carried out in accordance with the procedural guidance of the Environmental Protection Act 1990 Part IIA (or equivalent guidance which may subsequently update or replace it), and appropriate remediation/mitigation proposals. The approved scheme shall be implemented in accordance with the approved remediation/mitigation proposals.

Reason: To protect the health of the public and the environment from hazards arising from previous contamination of the site which might be brought to light by development of it.

7. Prior to any other works commencing on site, the entire site frontage shall be cleared and maintained thereafter clear of any obstruction exceeding 1m in height relative to the nearside carriageway edge in order to maximise visibility for drivers emerging from within the site onto the classified highway.

Reason: To ensure safe and suitable access for all users, in the interests of highway safety.

8. Prior to the first occupation of the new dwelling, the existing caravan/mobile home on the site shall be permanently removed from the site on the understanding that the new dwelling is a replacement in terms of residential unit on the site in order to avoid an increase in the use of the substandard access.

Reason: To ensure safe and suitable access for all users ensuring there is no intensification of a substandard access, in the interests of highway safety.

9. Notwithstanding the approved plans, prior to the first occupation of the new dwelling, space shall be provided within the site curtilage for the parking and turning of two vehicles for each of the existing (No. 57) and the proposed (No 57a) dwellings. The space shall be laid out in accordance with a scheme first submitted to and approved in writing by the local Planning Authority and be maintained throughout the life of the development free of any impediment to its designated use.

Reason: To ensure adequate parking and turning provision, in the interests of highway safety.

10. Prior to their incorporation in to the building hereby approved, details and/or samples of the facing materials to be used shall be submitted to and approved in writing by the Local Planning Authority. The development shall thereafter be constructed using the approved facing materials.

Reason: In the visual interest of the building and the surrounding area.

11. No development, including preparatory works, shall commence until protective fences have been erected around the protected tree shown on the block plan. Such fencing shall conform to best practice as set out in British Standard 5837:2012 (or equivalent document which may update or supersede that Standard) and ensure that no vehicles can access, and no storage of materials or equipment can take place within, the root and canopy protection areas. The fences shall be

retained in situ during the course of ground and construction works, with the protected areas kept clear of any building materials, plant, debris and trenching, and with existing ground levels maintained; and there shall be no entry to those areas except for approved arboricultural or landscape works.

Reason: In the interests of safeguarding existing habitat and the visual amenities of the area, recognising that initial preparatory works could bring about unacceptable impacts.

12. Prior to the occupation of the dwelling a scheme of soft landscaping shall be submitted to and approved in writing by the Local Planning Authority. The scheme should evidence compliance with British Standard (BS) 3936: 'Part 1 - Specification for trees and shrubs', BS3969 - 'Recommendations for turf for general purposes' and BS4428 - 'Code of practice for general landscape operations (excluding hard surfaces)'. All planting, seeding or turfing comprised in the approved scheme shall be carried out in the first planting and seeding seasons following the first occupation of the dwelling or the completion of the development, whichever is the sooner; and any plants which within a period of five years (ten years in the case of trees) from the completion of the development die, are removed or become seriously damaged or diseased shall be replaced in the next planting season with others of similar size and species and thereafter retained for at least the same period, unless the Local Planning Authority gives written consent to any variation.

Reason: In the interest of the visual setting of the development and the surrounding area.

13. Notwithstanding the plans hereby approved, prior to the construction of a boundary wall, fence or gate, details of the position, appearance and materials of such boundary treatments shall be submitted to and approved in writing by the Local Planning Authority. The boundary treatments shall be completed in accordance with the approved details before the dwelling to which they serve is first occupied.

Reason: In the interests of the character and appearance of the area.

14. The dwelling shall be constructed and fitted out so that the estimated consumption of wholesome water by persons occupying the dwelling will not exceed 110 litres per person per day, consistent with the Optional Standard as set out in G2 of Part G of the Building Regulations (2015). The developer must inform the building control body that this optional requirement applies.

Reason: To ensure that future water resource needs, wastewater treatment and drainage infrastructure are managed effectively, so to satisfy the requirements of policy SD3 of the Local Plan.

15. Prior to first occupation, one vehicle charging point shall be provided for each respective holiday let.

Reason: To prepare for increased demand of electric vehicles in future years.

16. All verges shall be finished in a mortar finish. There shall be no use of dry verge (cloaking tile) systems. Notwithstanding the provisions of the Town and Country Planning (General Permitted Development) (England) Order 2015, or any statutory instrument amending, revoking and/or replacing that Order, there shall be no later installation of a dry verge system.

Reason: In the visual interest of the building and local distinctiveness.

17. Gutters and downpipes shall have a black finish and be fixed direct to the brickwork on metal brackets. No fascia boards shall be used.

Reason: In the visual interest of the building and local distinctiveness.

18. Notwithstanding the provisions of the Town and Country Planning (General Permitted Development) (England) Order 2015, or any statutory instrument amending, revoking and/or replacing that Order, the dwelling hereby permitted shall not be enlarged, extended or altered without the prior grant of planning permission pursuant to an application made to the Local Planning Authority in that regard.

Reason: To maintain control in the interest of the character and amenity of the area, having regard to the setting and size of the development, the proximity to existing features on or adjacent to the site, and the effect upon neighbouring properties and/or the street scene.

You are advised of the following matters:

- a. The responsibility and subsequent liability for safe development and secure occupancy of the site rests with the developer and/or landowner. This grant of planning permission does not give a warranty of ground support or stability; neither does it necessarily imply that the requirements of any other controlling authority would be satisfied.

In dealing with the application, and further to pre-application advice where that has been given, the Local Planning Authority has positively sought to determine the application in a timely fashion and so promote the delivery of sustainable development in the District. Where practicable, feasible and necessary, and irrespective of the above decision, officers have made proactive attempts to find solutions to identified issues or to improve the quality of the development through negotiation with applicants and/or their nominated representatives, in order to foster the delivery of sustainable development and objectives of the Development Plan.

Changes in intention: any deviation from the approved plans/drawings and/or details should be discussed with the Local Planning Authority in advance. This includes circumstances where the applicant/developer subsequently identifies inaccuracies with the approved documents or conflict with other regulatory requirements. A formal application to amend the proposals or secure a revised permission may be necessary. Failure to secure necessary approval may result in the commencement of enforcement proceedings.

Scope of this decision: this is a planning decision notice which, unless expressly applied for and stated in the description of development above, conveys no decision of associated planning consent (such as listed building or advertisement consent); nor does it convey a decision under, or override, supersede or negate, any other legislation or the need to comply with restrictive covenants under Civil Law. In particular the necessary approval under the Building Regulations and the Public Health Acts must be obtained before the carrying out of building works. Where the adopted highway, including verges and pavements, is to be altered, the Local Highway Authority (Derbyshire County Council) should be contacted to establish its requirements.

Right of appeal to the Secretary of State: if you are aggrieved by the decision of the Local Planning Authority to refuse permission or consent for your proposal or to grant it subject to conditions, then you can appeal to the Secretary of State under Section 78 of the Town and Country Planning Act 1990, subject to the following:

- if this is a decision on a planning application relating to the same or substantially the same land and development as is already the subject of an enforcement notice, any appeal must be made within 28 days of the date of this notice;
- if an enforcement notice is subsequently served relating to the same or substantially the same land and development as in your planning application, any appeal must be made within 28 days of the date of service of the enforcement notice, or within 6 months (12 weeks in the case of a householder or minor commercial appeal, the latter as defined by Part 1 Article 2 of the Town and Country Planning (Development Management Procedure) Order 2015) of the date of this notice, whichever period expires earlier;
- if this is a decision on an application for consent to cut down, top, lop, uproot or otherwise destroy a tree or trees protected by a tree preservation order, or for a decision on a lawful development certificate for proposed works to a listed building, any appeal must be made within 28 days of the date of this notice;
- if this is a decision on an application for advertisement consent, any appeal must be made within 8 weeks of the date of this notice;
- if this is a decision on an application for householder or minor commercial development (the latter as defined by Part 1 Article 2 of the Town and Country Planning (Development Management Procedure) Order 2015), any appeal must be made within 12 weeks of the date of this notice;
- in all other cases, except for a decision on a lawful development certificate for an existing or proposed use or development, any appeal must be made within 6 months of the date of this notice.

The Secretary of State can allow a longer period for giving notice of an appeal but will not normally be prepared to use this power unless there are special circumstances which excuse the delay in giving notice of appeal.

Appeals must be made using a form which you can get online at www.gov.uk/planning-inspectorate or from the Planning Inspectorate at Temple Quay House, 2 The Square, Temple Quay, Bristol, BS1 6PN. The Secretary of State need not consider an appeal if it seems to them that the Local Planning Authority could not have granted planning permission or consent for the proposal or could not have granted it without the conditions they imposed, having regard to the statutory requirements, to the provisions of any development order and to any directions given under a development order. In practice, the Secretary of State does not refuse to consider appeals solely because the Local Planning Authority based their decision on a direction given by the Secretary of State. If you intend to submit an appeal that you would like examined by inquiry then you must notify the Local Planning Authority and Planning Inspectorate (inquiryappeals@planninginspectorate.gov.uk) at least 10 days before submitting the appeal. Further details can be found online at www.gov.uk/planning-inspectorate.

Street naming and numbering: the applicant and/or developer is reminded of the Council's responsibility to issue official addresses for all residential and business premises within South Derbyshire. All new addresses are allocated in line with our street naming and numbering guidance available at www.southderbyshire.gov.uk and you are advised to engage with the Council as soon as possible to enable the issuing of any street and property names/numbers to be created by this development. Any number and/or property name that is associated with identifying individual properties must be displayed in a clear, prominent position that can be read from the roadside. It is the developer's responsibility to erect the appropriate signage once the building(s) is/are ready for occupation. There are two types of the name plate the Council uses: Type A carries the Council's crest, whilst Type B does not. You are advised that the Types are usually expected in the following locations:

- Type A: on classified (A, B and C) roads, at junctions with classified roads, and at the commencement of local distributor roads (roads acting as through routes within developments);
- Type B: intermediate name plates along local distributor roads, on collector roads (roads which run within a development providing access and linking small access roads and access ways), on access roads (roads serving a small number of houses which may also have a surface shared by pedestrians and vehicles), and access ways which have a different name from their access road; all unless at a junction with a classified road (where Type A will be expected instead).

High speed communications: the applicant and/or developer is strongly encouraged, as part of the delivery of any premises on the site, to provide full fibre broadband connections (i.e. from streetside cabinet to the property). Further details of initiatives to support the provision of full fibre connections as part of broadband installation at the site can be obtained from Digital Derbyshire on broadband@derbyshire.gov.uk.

Fire safety in new buildings: the applicant/developer is encouraged to install a sprinkler system in any new premises created on the site in order to reduce the risk of danger from fire to future occupants and property.

Purchase Notices: if permission is refused or granted subject to an unacceptable condition, and the owner of the property claims that the property has consequently become incapable of reasonably beneficial use in its existing state and cannot be rendered capable of reasonably beneficial use by the carrying out of any development/work which has been or would be permitted, the owner may serve on the Council a purchase notice requiring that Council to purchase their interest in the land in accordance with the provisions of Part VI of the Town and Country Planning Act 1990.

Enquiries: Any correspondence or enquiries concerning this decision should be sent to planning@southderbyshire.gov.uk quoting the above reference number.
