

Styling Your Windows. The Choice Is Yours

70mm Flush Window System

Styling your windows isn't limited to outside; you can make changes to the inside of your window too, giving you complete choice over every aspect of your home environment.

The Flush Sash is designed to work in a traditional property, rather than feel like an out of place modern addition. With modern technology packed inside a traditional frame, this is the best of both worlds for any home that wants to maintain its aesthetic without making compromises in security and energy efficiency.

Traditional Look, With Modern Technology

Whether modern or traditional, the flush can be customised to suit your property, with both woodgrain and colour foil options (both for inside and outside), along with matching hardware. Whether it's a tear drop handle, or Georgian bars, we have the perfect window for you.

Agate Grey with Mechanical Sash & Mullion

Rosewood with Welded Sash
