	EIA	Pegasus Group (Pegasus) is the consultancy that has compiled this Environmental Statement (ES). This consultancy was established in 2003 and has over the years expanded to a company that strives for "good development" across the whole of the UK. Pegasus is Institute of Sustainability and Environmental Professionals (ISEP, formerly IEMA) 'Quality Mark' Accredited and its ESs and the processes that it undertakes to create them are regularly subjected to external review via this accreditation to ensure that all Pegasus Environmental Impact Assessments (EIA) are legally compliant and apply best practice.
	Cultural Heritage and Archaeology	The Cultural Heritage chapter of the ES, and associated appendices, have been prepared by Associate Heritage Consultants within the Pegasus Group Heritage Team with expertise in archaeology and built heritage and hold appropriate academic qualifications in archaeology and town planning and relevant accreditation (MCIfA, IHBC RTPI) The chapter has been reviewed by the Executive Director for Heritage for Pegasus Group, a Member of the Institute for Archaeologists and a Fellow of the Society of Antiquaries of London. As required by the 2017 EIA Directive, this Chapter has therefore been prepared and reviewed by a "competent expert" with "sufficient expertise".
	Landscape and Visual	Pegasus Group is a registered Landscape Institute Practice. The Landscape and Visual Impact Chapter has been written by a Chartered member of the Landscape Institute (LI) with over 20 years' experience as a Landscape Architect, specialising in Landscape and Visual Impact Assessment (LVIA). The author has completed numerous detailed LVIA's as part of

EIA Statement of Expertise

		Environmental Statements for development sites across the UK, including residential, mixed-use, employment and energy development. As an inherent part of this work, Pegasus Group apply the iterative process of landscape and visual assessment to: inform design principles; respond to landscape and visual constraints and opportunities; identify potential landscape and visual impacts; and incorporate robust mitigation measures in response
ADC Infrastructure 	Transport and Access	This Chapter has been prepared by ADC Infrastructure Ltd, a company competent and experienced in undertaking EIA relating to transport. ADC Infrastructure Ltd has provided transportation and highways support in relation to the Site and is well placed to understand the requirements of the Proposed Development, as well as having an in-depth knowledge of the Site's locality and traffic conditions in the area. The primary author of this chapter is an Associate Director with over 30 years of experience in transportation planning. The author has an HNC in Civil Engineering and is a member of the CIHT.
